

ULTRA
QUARTZ

FAQS

1. Can I use quartz countertops in outdoor kitchens or areas exposed to direct sunlight?

It's not a great idea to use quartz outdoors because prolonged sunlight exposure can fade its color. Quartz works best indoors.

2. What should I do if I plan to modify or cut my quartz countertop (e.g., for Re-installation)?

If you're thinking about making changes, it's usually better to get help from a professional for the best results. Optimize dust by using tools with good dust collection, wearing the right safety gear, and making sure there's good ventilation.

3. Do I need to seal my quartz countertop?

Nope, quartz countertops are designed to be non-porous, so there's no need for sealing. They're naturally good at resisting stains.

4. What should I do if I accidentally chip or damage my quartz countertop?

If it's a small chip or crack, it's often fixable by a pro. For more serious damage, reach out to a countertop expert for guidance.

5. Can I use quartz cleaner like regular household cleaners?

It's a good idea to stick with cleaners made for quartz countertops. Regular household cleaners can have harsh stuff that might not be friendly to your beautiful quartz surface over time.

6. How often should I reseal my quartz countertop, and can I do it myself?

The good news is that quartz countertops don't need sealing. It's not something you'll have to worry about or do yourself.

7. How do I keep my quartz countertop looking shiny and awesome?

To keep that lovely shine, every so often, you can use a quartz countertop polish. Just follow the instructions from the company, and your countertop will stay looking fantastic.

8. Are there any natural tricks to remove those stubborn stains from my quartz countertop?

For those tough stains, you can make a paste using water and a little dish soap. Gently scrub the stain, rinse, and dry it.
